

PROFESSIONAL LIFTING EQUIPMENT

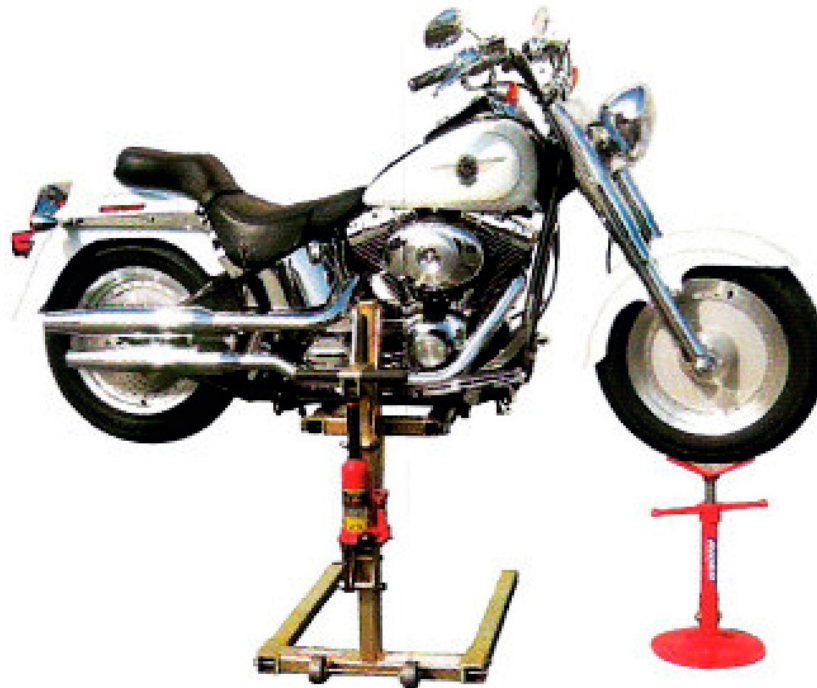

WHEN SAFETY DEPENDS ON PERFORMANCE!

789

Tire Stabilizer Stand

INTENDED USE

Used in conjunction with model 777D & 787D motorcycle lifts. Removing a tire and wheel combination will shift the weight of the motorcycle to the opposite side of the lift arms. This stand will support and stabilize the shifting of weight by placing the stand under the tire and wheel combination not being removed.

FEATURES

- 12 3/4" Round Base for a firm footing.
- Bearing Mounted Spin Handle easily and quickly lowers and raises the 1 1/4" diameter acme threaded screw.
- "V" Shaped Saddle is rubber faced to prevent tire slippage.
