

PROFESSIONAL LIFTING EQUIPMENT

WHEN SAFETY DEPENDS ON PERFORMANCE!

72036D

4 Ton Capacity Forklift Jack

INTENDED USE

A jack with a low enough profile to raise forklifts.

FEATURES

- Serrated saddle which handles flat surfaces can be rotated out of the way so edged surfaces can be raised in the rounded lift arm cutout.
- 30" removable handle for ease of pumping and storage when not in use.
- Our "fingertip control" release knob provides slow, controlled, lowering of the load.
- Safety bypass and overload systems prevent cylinder damage and prevent the jack from being used beyond the ASME/PASE load-limiting standard.

TWO-POSITION SADDLE @ SCISSORS END

**SERRATED SADDLE
LIFTS FLAT SURFACES**

**ROUNDED CUTOUT
LIFTS EDGED SURFACES**
